BRETS.tech

CRM

CUSTOMER RELATIONSHIP MANAGEMENT

Every enquiry answered. Every deal tracked.

Built around the thing that actually loses deals: an enquiry nobody called back, and no way to tell afterwards that it happened.

KEY BENEFITS

No enquiry left behind
Website, ad forms and referrals land in one inbox.

Call from the screen
Dial, log the outcome and set the follow-up in one go.

Reminders on the phone
Follow-ups arrive by web push, not on a forgotten list.

See every deal
Stages you define, with each deal's value and age.

Know why deals are lost
What closed, what was lost, the reason, and by whom.

MODULES

- Inbound leads
- Pipeline
- Calling desk
- Follow-ups
- Contacts
- Conversions

DEPLOYMENT

Four shapes, one product

The software is identical in all four. What changes is where it runs, whose name is on the address, and who is isolated from whom.

Demo — FREE

A complete, working console with sample data, open right now. Enter your own data and it stays — the demo is not wiped nightly, because evaluating an ERP takes a week.

SaaS — MONTHLY

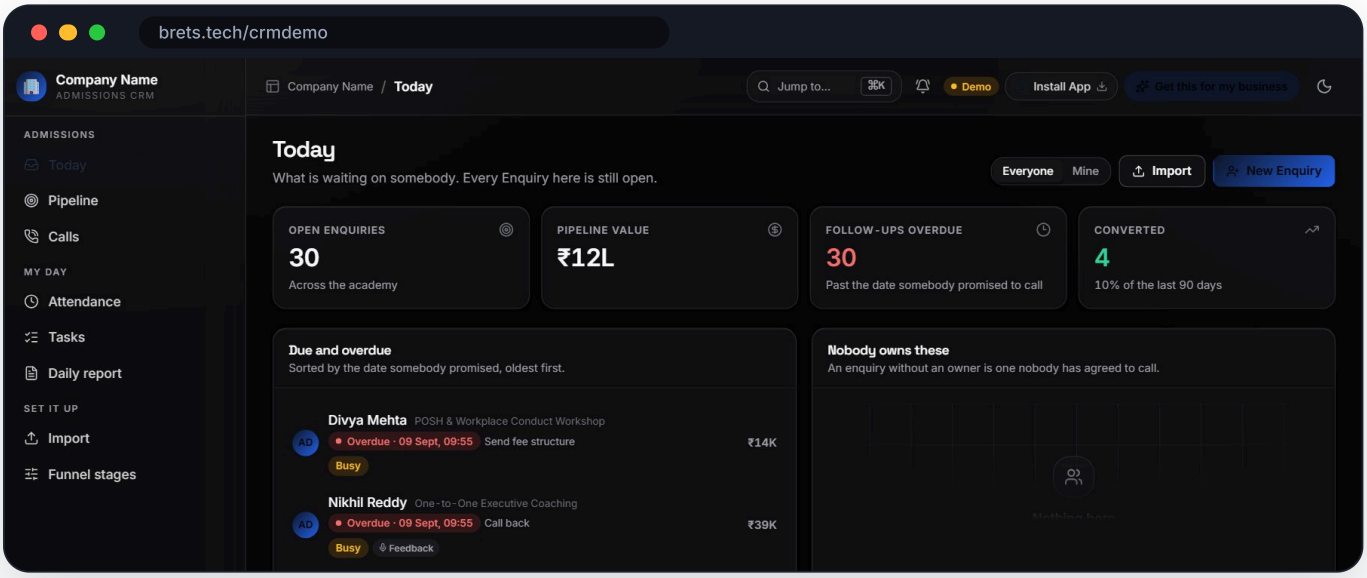

Your own tenant on our infrastructure, at your own address on this platform. Fastest to start, nothing to run, upgrades arrive on their own.

Your own domain — MONTHLY

The same tenant, served at erp.yourcompany.com with your logo and colours. Your staff never see another company's name over the door.

Dedicated server — ANNUAL

Your own database and your own server, isolated from every other customer, with one invoice and nothing for your team to administer.

Try it first. Then tell us what is missing.

The most useful conversation we can have is the one after you have used it — because by then you are describing your business, not guessing at features.
